TRITON 125

Durable. Affordable. Safe. Those are just a few things that come to mind when describing the all new Triton 125. A fresh take on our mid-size go kart, the Triton 125 will exceed customer expectations with its eye-catching design, superior safety attributes, and overall durability. The adjustable driver's seat can accommodate those taller and shorter riders with the central hand shifter close in reach. Not lacking in looks, the Triton comes in catchy color options and is equipped with two-toned stylish seats.

When it's time to hit the trails, riders will enjoy the convenience of the electric start and automatic 120cc engine, only needing to shift to go in forward, neutral, or reverse. Four point seat belt harnesses ensure they'll stay safe and secured inside the vehicle, even while encountering the bumpiest terrain. And when the path ahead looks rough, adjustable front and rear shocks are ready to take it on. The conveniently located USB port will keep electronics charged. At the end of an exciting day, three LED light bars and tail lights will brighten the trails on your way home. Front and rear disk brakes bring you to a stop until your next outdoor adventure.

TRITON 125
